COMMONWEALTH OF PENNSYLVANIA DEPARTMENT OF TRANSPORTATION WINS 2024 PERPETUAL PAVEMENT AWARD

The Asphalt Pavement Alliance (APA) announced today that the Commonwealth of Pennsylvania Department of Transportation has won a 2024 Perpetual Pavement by Performance Award for State Route 0168 in Beaver County.

This award honors agencies whose roadways demonstrate the characteristics expected from long-life asphalt pavements: excellence in design, quality in construction, and value for the traveling public. To qualify for this prestigious award, a pavement must be at least 35 years old, never experienced a structural failure, and have an average interval between the resurfacing of the winning pavement of no less than 13 years. National Center for Asphalt Technology engineers evaluated the nominations and validated the winners.

The Commonwealth of Pennsylvania Department of Transportation won the award for a 2.21-mile section of State Route 0168 in Beaver County. Resurfacing in 2010 and 2019 enhanced the road's structural support to accommodate increased traffic demands. The roadway features wider asphalt shoulders with adjacent stabilized areas, providing emergency access to the nearby nuclear power plant. Its excellent drainage system prevents debris accumulation, contributing to the road's outstanding condition. Despite accommodating an average of 4,343 vehicles daily, including 7% truck traffic, the pavement shows minimal distress and significant remaining service life after 38 years—exemplifying Perpetual Pavement performance.

“Asphalt roads can be designed, built, and maintained to indefinitely prevent deep distresses,” said Dr. Buzz Powell, P.E., Technical Director of the APA. “The resulting Perpetual Pavement structure is an excellent investment for taxpayers because it only requires periodic surface renewal, has the most preservation options, and never requires reconstruction. Advantages of Perpetual Pavements include durability, economics, sustainability, and smoothness. The smoothness advantage of asphalt pavements is indefinitely extended with Perpetual Pavement since deep distresses that cause roughness never occur.

The Asphalt Pavement Alliance (www.driveasphalt.org) is a coalition of the National Asphalt Pavement Association, the Asphalt Institute, and the State Asphalt Pavement Associations. The

Asphalt Pavement Alliance's mission is to establish asphalt as the preferred choice for quality, performance, and the environment.

###

The Asphalt Institute (www.asphaltinstitute.org) is the international trade association of petroleum asphalt producers, manufacturers, and affiliated businesses. AI promotes the use, benefits, and quality performance of petroleum asphalt, through engineering, research, marketing, and educational activities.

The National Asphalt Pavement Association (www.asphaltpavement.org) represents the interests of U.S. asphalt producers/contractors before Congress, federal agencies, and other national trade and business organizations. NAPA supports an active research program designed to improve the quality of asphalt pavements and paving techniques used in the construction of roads, streets, highways, parking lots, airports, and environmental and recreational facilities.

The State Asphalt Pavement Associations (www.sapainc.org) represent the interests of asphalt pavement producers and paving companies at the state and local level across the United States.
